American Society for Metals

PRESIDENTS

ALBERT E. WHITE	1921	ALEXANDER H. d'ARCAMBAL	1932	BRADLEY STOUGHTON	1942
FRANK P. GILLIGAN	1922	WILLIAM B. COLEMAN	1933	HERBERT J. FRENCH	1943
†TILLMAN D. LYNCH	1923	†WILLIAM H. PHILLIPS	1934	MARCUS A. GROSSMANN	1944
†GEORGE K. BURGESS	1924	BENJAMIN F. SHEPHERD	1935	KENT R. VAN HORN	1945
†WILLIAM S. BIDLE	1925	ROBERT S. ARCHER	1936	CHARLES H. HERTY, JR.	1946
†ROBERT M. BIRD	1926	EDGAR C. BAIN	1937	ALFRED L. BOEGEHOLD	1947
J. FLETCHER HARPER	1927	GEORGE B. WATERHOUSE	1938	FRANCIS B. FOLEY	1948
FREDERICK G. HUGHES	1928	WILLIAM P. WOODSIDE	1939	HAROLD K. WORK	1949
ZAY JEFFRIES	1929	JAMES P. GILL	1940	ARTHUR E. FOCKE	1950
†ROBERT G. GUTHRIE	1930	OSCAR E. HARDER	1941	W. E. JOMINY	1951
J. MITCHELL WATSON	1931			JOHN CHIPMAN	1952

SECRETARY

WILLIAM H. EISENMAN 1920–

FOUNDER MEMBERS

†T. E. BARKER †A. G. HENRY WM. H. EISENMAN WM. P. WOODSIDE A. E. WHITE

HONORARY MEMBERS

KOTARO HONDA
AXEL HULTGREN
CHARLES F. KETTERING
ZAY JEFFRIES
WILLIS R. WHITNEY
B. F. FAIRLESS

SAUVEUR ACHIEVEMENT MEDALISTS

†ALBERT SAUVEUR	1934	†ALBERT L. MARSH	1941	ROBERT S. ARCHER	1945
ZAY JEFFRIES	1935	BENJAMIN F. SHEPHERD	1942	EDGAR C. BAIN	1946
WILLIAM R. CHAPIN	1936	CHARLES H. HERTY, JR.	1943	F. P. ZIMMERLI	1947
HARRY W. McQUAID	1938	WALTER E. JOMINY	1944	M. A. GROSSMANN	1949
†STANLEY P. ROCKWELL	1939			CLARENCE E. SIMS	1950
A. W. MACHLET	1940			R. F. MEHL	1951

HENRY MARION HOWE MEDALISTS

E. J. JANITZKY	1922	CYRIL WELLS	1932	GERHARD ANSEL	1939	S. G. FLETCHER	1945
FRANCIS F. LUCAS	1924	MAXWELL GENSAMER	1932	ROBERT F. MEHL	1939	MORRIS COHEN	1945
HORACE H. LESTER	1925	JOHN F. ECKEL	1932	M. A. GROSSMANN	1941	CHARLES R. AUSTIN	1946
WESLEY P. SYKES	1927	JOSEPH V. EMMONS	1933	MORRIS ASIMOW	1941	MAURICE C. FETZER	1946
OSCAR E. HARDER	1928	JOHN CHIPMAN	1934	S. F. URBAN	1941	W. A. PENNINGTON	1947
RALPH L. DOWDELL	1928	NICHOLAS A. ZIEGLER	1935	W. A. SCHLEGEL	1942	J. W. SPRETNAK	1948
H. J. FRENCH	1930	A. G. H. ANDERSEN	1937	SHADBURN MARSHALL	1943	B. L. AVERBACH	1949
EDGAR C. BAIN	1931	ERIC R. JETTE	1937	R. A. FLINN	1944	W. O. BINDER	1950
KARL HEINDLHOFER	1931	JOSEPH WINLOCK	1938	EARNSHAW COOK	1944	C. M. BROWN	1950
FRANCIS M. WALTERS	1932	R. W. E. LEITER	1938	J. A. FELLOWS	1944	RUSSELL FRANKS	1950
		C. S. BARRETT	1939	DARA P. ANTIA	1945	B. J. LAZAN	1951

THE GOLD MEDAL OF THE AMERICAN SOCIETY FOR METALS

ZAY JEFFRIES 1943 EARLE C. SMITH 1945 C. H. MATHEWSON 1947 F. C. FRARY 1948 EDGAR C. BAIN 1949
PAUL D. MERICA 1951

†Deceased

Table of Contents for Vol. 61

Advances in Induction Heating, reported by John Parina, Jr. 5–80
Advances in Machining and Cutting Operations, by Taylor White 1–84
A.I.S.I. Boron and Tentative Standard Steels *(d)* 6–96B
Analysis With Electron Beams, by R. Castaing *(a)* 5–182
An Appraisal of the Shell Molding Process, by Harold J. Roast 4–71
Atomic Age
Atomic Energy for Combating Cancer, by Shields Warren 2–72
Power From the Atom 3–70
Atomic Energy for Combating Cancer, by Shields Warren *(aa)* 2–72
Basic Lining for Cupolas *(cp)* 6–91
Basic Stages of Deformation, by W. A. Wood, G. R. Wilms and W. A. Rachinger *(a)* 2–98
Bauxite Pig Iron, by N. Hajto and F. Varga *(a)* 1–160
Behaviorism of Elements in Iron and Steelmaking, by Herbert W. Graham 1–87
Better Lubrication of Cutting Tools *(cp)* 3–52
Blast Furnace Sinter, by R. E. Powers *(a)* 1–112
Blowing a Thomas Converter With Oxygen, by G. Husson *(a)* 2–108
Boron Steel Compositions, A.I.S.I. *(d)* 6–96B
British Views of U. S. Nonferrous Industry, by the British Nonferrous Metals Productivity Team *(a)* 1–118
Carbides in High Speed Steel—Their Nature and Quantity, by Francis Kayser and Morris Cohen 6–79
Challenges Statement About Aluminum Bearings, by P. G. Forrester; Rebuttal, by E. A. G. Liddiard, H. K. Hardy, J. W. Cuthbertson and J. V. Higgs *(c)* 2–79
Chromium Impregnation of Carbon Steel, by T. P. Hoar and E. A. G. Croom *(a)* 3–118
The Chromium Plating of Light-Metal Cylinders, from *The Engineer (a)* 4–120
Cold Extrusion of Steel Shell at Heintz Mfg. Co. *(cp)* 5–72
Cold Working of Co-Cr-Ni-Fe Base Alloys, by D. N. Frey, J. W. Freeman and A. E. White *(a)* 5–184
Continuous Furnace for Fast Annealing of Tin-Plate, by M. D. Stone and E. A. Randich 2–62
Control of Porosity in Gunmetal Castings, by L. Buckley and E. C. Mantle *(a)* 5–188
Control of Weld Cracking, by C. L. M. Cottrell, M. D. Jackson and J. G. Whitman *(a)* 5–116
Correction (to Data Sheet, November 1951, p. 80-B), by F. C. Hull *(c)* ... 2–84
Course of Impact Fracture, by L. H. Satz *(c)* 3–79
Creep in Copper, by N. D. Benson, J. McKeown and D. N. Mends *(a)* ..5–162
Creep Properties of Austenitic Alloys, by A. M. Borzdyka *(a)* 3–156
Creep Properties of Solution Treated N-155, by D. N. Frey, J. W. Freeman and A. E. White *(a)* 6–148
d'Arcambal, A. H.—A Page for Our Biographical Dictionary *(b)* 6–86
Data Sheets
A.I.S.I. Boron and Tentative Standard Steels 6–96B
Isothermal Transformation of 9% Cr Steel, by Wm. L. Frankhouser 5–96B
S-Curves for Chromium Stainless Steels, data by Republic Steel Corp. 4–96B
Temperature Conversions 1–80B
Tentative Hardenability Bands for Boron Steels, by American Iron and Steel Institute 2–80B
Defects in Rolled Products, by Paul Gruner and T. Bruggeman *(a)* 3–98
Deformation Pattern, by J. J. Buczynski and N. J. Finsterwalder *(c)* 2–83
Dendritic Growth in Weld Metal, by M. A. Scheil *(c)* 2–80
Dilastrain Method for Determining the Endurance Limit of Materials, by Jos. L. Rosenholtz and Dudley T. Smith 2–85
Direction Reduction of Iron Ore, by M. Tenenbaum and C. M. Squarcy *(a)* ..3–147
Dogged Metal, by George L. Parrott *(c)* 4–96
A Dutch Engineer Comments on U. S. Metal Fabrication, by Eduard M. H. Lips *(c)* 5–94
Effect of Hydrogen on Low-Alloy Steels, by J. D. Hobson and C. Sykes *(a)* ..3–114
Effect of Phosphorus on Magnesium Alloys, by E. F. Emley, A. C. Jessup and W. F. Higgins *(a)* 5–156
Efficiency in the Laboratory, by C. A. Liedholm *(c)* 2–82
Embrittlement of Welds, by A. E. Flanigan and M. Kaufman *(a)* 5–168
An Eminent Swiss Metallurgist, by Max Huber *(c)* 4–95
Enamel Coatings, by P. E. Cavanagh *(c)* 2–83
European Experiments on Vacuum-Melted Pure Iron, by Tom Bishop .. 4–75
Explosive Nature of Concentrated Nital, by J. E. Reynolds, Jr. *(c)* 4–96
Fabrication of Tungsten, by A. L. Simmons *(a)* 5–172
Factors Influencing Structure of Electrodeposits, by J. J. Dale *(a)* 3–106
Fast Cutting of Metal by Better Mechanical Engineering, by *Metal Progress'* Special Reporter 6–94
Field of Cemented Carbides Expanded by Titanium Compositions, by John C. Redmond and John W. Graham .. 4–67
Fine Crystals at Polished Surface, by Bruce Chalmers *(c)* 5–94
Finishing Metal Parts for Telephones, by F. B. Rinck 6–65
Flow of Liquid Metals on Solid Metal Surfaces, by G. L. J. Bailey and H. C. Watkins *(a)* 6–144
Forgeability, Machinability and Hardenability of Boron Carburizing Steels, by S. L. Widrig and Wilson T. Groves 6–71
Formation of Zinc Crystals, by G. Brinson and A. J. W. Moore *(a)* 5–180
Friction and Wear at High Speeds and Pressures, by R. L. Johnson, M. A. Swikert and E. E. Bisson *(a)* 4–114
Grain Displacement in Metal Stressed Below Elastic Limit, by Norman P. Goss 5–87
Grain Refinement of Aluminum Alloys, by A. Cibula *(a)* 2–152
Graphite Spherulites, by G. P. Contractor *(c)* 2–82
Hard Chromium Plate and Bright Plating of Steel for Die Castings, by Allen G. Gray 6–77
Have You Something Hard to Grind or Hot to Handle? *(cp)* 3–53
Heat Treating, Setting and Shot-Peening of Mechanical Springs, by F. P. Zimmerli 6–97
Heat Treatment in Magnetic Field, by Matildo Goertz *(a)* 1–106
High-Temperature Alloy for Rotor Blades, by G. T. Harris and H. C. Child *(a)* 4–148
High-Temperature Aluminum Alloy, by B. M. Loring, W. H. Baer and C. G. Ackerlind *(a)* 6–162
High-Temperature Microscope, by D. W. Dewhirst and M. J. Olney *(a)* ..5–166
High-Temperature Scale Resistance, by Albert M. Portevin *(c)* 4–94
High-Speed Toolsteels, by K. J. B. Wolfe *(a)* 5–146
High Yield of Weld Metal, by R. A. Huseby 5–96
How Can We Appraise Metals for High-Temperature Service? by Thomas J. Dolan 3–55
The Impending Revolution in Casting Processes, by H. H. Harris 3–65
An Improved Cell for Electrolytic Polishing, by L. W. Gleekman, G. E. Evans and C. S. Grove, Jr. 6–92
Improved Finish for Magnesium Alloys, by H. A. Evangelides *(a)* 6–166
Improvements in Quality of Deep Drawing Sheet Steel, by T. F. Olt and R. S. Burns 2–51
Induction Heating for Continuous Heat Treatment of Sheet and Strip, by F. C. Hull and Howard Scott 2–57
Influence of Surface Condition on Quenching Rates, by Walter Peter *(a)* 4–162
Influence of Temperature, Gas Composition and Flow on Carbo-Nitrided Cases, by W. H. Holcroft and D. J. Schwalm 4–89
Internal Friction and Aging of Steel, by J. D. Fast and L. J. Dijkstra *(a)* .5–144
Isothermal Transformation of Nickel Steels, from *Metallurgia (a)* 2–102
Isothermal Transformation of 9% Cr Steel, by Wm. L. Frankhouser *(d)* .5–96B
The Kroll Process for Titanium Sponge, from "Ductile Titanium", *Metal Industry (a)* 5–122
Later Work on the Above (see Blowing a Thomas Converter With Oxygen), by P. Leroy and E. Devernay *(a)* ..2–112
Light Metal Castings for Aircraft Structures, by Keith F. Finlay 1–81
Light Metals Cast in Gypsum-Sand Molds *(cp)* 3–51
Liquid Sodium—A Noncorrosive Coolant, by R. F. Koenig and S. R. Vandenberg 3–71
Maintenance Expedited by Stainless Bolting, by Milton Gallup *(c)* 5–95
The Man Was Ready, Ghost by David W. Pettigrew, Jr. *(c)* 5–96
Martempering and Slack Quenching *(cp)* 6–90
Mechanical Descaling Method for Wire, by Von Walter Zwierz *(a)* 4–158
Mechanized Heat Treatment Points to New Goals in Costs and Quality, by Arthur H. Allen 1–68
Metal Cleaning and Finishing Since the War, by Vernon A. Lamb 1–76
The Metals Used for Mechanical Springs, by F. P. Zimmerli 5–97
Nested Electrode Welding, by William A. Snyder *(a)* 2–150
Neutralization of Waste Pickle Liquor, by R. D. Hoak *(a)* 6–156
New Equipment for Fatigue Tests, by National Bureau of Standards *(a)* .1–162
New Super-Alloys, by R. H. Thielemann, J. C. Mertz and W. P. Eddy, Jr. *(a)* 3–127
Nominating Committee for National Officers, American Society for Metals 4–81
Notch Toughness of Low-Alloy Steels, by R. L. Rickett and J. M. Hodge *(a)* 1–156
Openhearth Charge Ores, by J. J. Golden and H. E. Warren, Jr. *(a)* . 1–152
"Orange-Peeling" of Aluminum, by G. W. Weeks *(a)* 5–184
Oxygen in Electric Furnace Steelmaking, from "Oxygen Lancing in Electric Arc Steelmaking Furnaces", *The Engineer (a)* 5–152
A Page for Our Biographical Dictionary—A. H. d'Arcambal *(b)* 6–86
Perchloric Acid Hazard, by E. Knuth-Winterfeldt *(c)* 3–80

(a) Abstract; (aa) Atomic Age; (b) Biography; (c) Correspondence; (cp) Critical Points; (d) Data Sheet.

Phosphate Coatings, by A. C. Hanson *(c)* 2-81
Plating Aluminum With Nickel, by A. G. Thomson *(a)* 6-168
Plating Room Controls for Pollution Abatement (Compiled by the Ohio River Valley Water Sanitation Commission) *(a)* 2-164
Polishing Cermets, by Clinton C. McBride *(c)* 2-84
Polishing Tantalum, by G. W. Wensch, K. B. Bruckart and M. Conolly *(c)* .. 3-81
Portevin Medal, by J. Laine *(c)* 2-81
Powder Metallurgy: 1925—1950—1972, by A. J. Langhammer 1-72
Power From the Atom *(aa)* 3-70
Problems of Metallic Fatigue at High Temperatures, by Thomas J. Dolan 4-97
Progress in the Welding Industry, by B. Karnisky 4-59
Properties of Molybdenum Made by Arc Casting and Powder Metallurgy, by James H. Bechtold and Howard Scott 4-82
Pure and Applied Science in American Metallurgy, by Cyril Stanley Smith. 4-51
The Recrystallization of Martensite, by K. A. Malyshev, V. D. Sandovskii and B. G. Sazonov *(a)* 2-158
Redefinition of "Strength of Materials", by A. C. Vivian *(a)* 6-140
Refining Steel With Oxygen, by Franz Rapatz *(c)* 4-94
Resin Binders for Foundry Sand, by P. G. Pentz *(a)* 3-126
Roll Size Effects in Rolling of Strip, by N. H. Polakowski 2-67
S-Curves for Chromium Stainless Steels, data by Republic Steel Corp. *(d)* .. 4-96B
Selling Research to Management, by Perry B. Cassidy *(c)* 3-78
Sheath Working of Zirconium Ingots, by E. T. Hayes, G. L. Frederic and E. D. Dilling 5-83
Sigma Phase in High-Purity 18-10, by Samuel J. Rosenberg and Carolyn B. Irish 5-92
Sinter and Sponge Iron in Swedish Practice, by T. L. Joseph *(a)* 1-118
Sinter Layer Formation on Cast Metals, by Yu. A. Klyachko and L. L. Kunin *(a)* 2-122
Sintering Iron Ore in England, by E. W. Voice, C. Lang and P. K. Gledhill *(a)* 1-107
A Small Section of Atomic Research *(cp)* 6-89
Softening Induced by Cold Working, by N. H. Polakowski *(a)* 6-122
Some Problems in the Fabrication of N-155 Alloy, by Hiram Brown 5-67
Spheroidal-Graphite Cast Iron for Crankshafts, by A. B. Everest *(a)* .. 4-126
Stains on Aluminum-Sprayed Steel Surfaces, by W. E. Ballard *(a)* 3-150
Steel for Machinery; Yesterday, Today and Tomorrow, by Muir L. Frey ... 1-55
Steel (Yes, Steel) With 0.45% Sulphur *(cp)* 3-54
Stress Relief in Magnesium Castings, by R. J. M. Payne *(a)* 2-124
Temperature Conversions *(d)* 1-80B
Tentative Hardenability Bands for Boron Steels, by American Iron and Steel Institute *(d)* 2-80B
Tentative Standard Steel Compositions, A.I.S.I. *(d)* 6-96B
Testing—Today and Tomorrow, by F. G. Tatnall 1-64
The Titanium Alloys Today, by Walter L. Finlay and Milton B. Vordahl 2-73
Titanium-Oxygen Alloys, by A. E. Jenkins and H. W. Worner *(a)* 5-124
Trends in Corrosion Control, by H. H. Uhlig 3-82
TTT-Diagrams for 7 and 9% Chromium Steels, by W. L. Frankhouser and G. N. Emmanuel 5-74
Turbine Blades "Sweat Cooled", by George Atwell Richardson *(c)* 3-81
Typical Properties of Beryllium-Copper Alloys, prepared by J. T. Richards *(d)* 3-80B
An Unusual Tin Bronze Casting, by Harold J. Roast 3-76
Use of O_2-CO_2 Blast in the Basic Converter, by Bo Kalling, Folke Johansson and Lennart Lindskog *(a)* 2-128
Wear on Cemented Carbide Tools, by E. M. Trent *(a)* 5-186
Welded Monoframes, by H. E. Cable *(c)* 3-79
The Welding of High-Pressure Pipes, by H. Hauttmann *(a)* 4-154
What Do We in the Universities Believe? by a Professor *(c)* 2-79
"Whiskers" on Metal Surfaces, by K. G. Compton, A. Mendizza and S. M. Arnold *(a)* 4-172
White Brass Plating One Solution to the Nickel Freeze, by Webster B. Knight 3-61
Work Required in the Formation of Martensite Nuclei, by G. V. Kurdymov and O. P. Maksimova *(a)* 1-122
Wrought Alloys of Magnesium-Cerium, by K. Grube, R. Kaiser, L. W. Eastwood, C. M. Schwartz and H. C. Cross *(a)* 5-140
Zirconium and Titanium Substitution for Manganese, by William W. Austin, Jr. *(a)* 2-162

List of Authors

Ackerlind, C. G., W. H. Baer and E. M. Loring—High-Temperature Aluminum Alloy *(a)* 6-162
Allen, Arthur H. Mechanized Heat Treatment Points to New Goals in Costs and Quality 1-68
American Society for Metals, Nominating Committee for National Officers 4-81
Arnold, S. M., K. G. Compton and A. Mendizza—"Whiskers" on Metal Surfaces *(a)* 4-172
Austin, William W., Jr. Zirconium and Titanium Substitution for Manganese *(a)* 2-162
Baer, W. H., B. M. Loring and C. G. Ackerlind—High-Temperature Aluminum Alloy *(a)* 6-162
Bailey, G. L. J. and H. C. Watkins—Flow of Liquid Metals on Solid Metal Surfaces *(a)* 6-144
Ballard, W. E. Stains on Aluminum-Sprayed Steel Surfaces *(a)* 3-150
Bechtold, James H. and Howard Scott—Properties of Molybdenum Made by Arc Casting and Powder Metallurgy 4-82
Benson, N. D., J. McKeown and D. N. Mends—Creep in Copper *(a)* 5-162
Bishop, Tom—European Experiments on Vacuum-Melted Pure Iron 4-75
Bisson, E. E., M. A. Swikert and R. L. Johnson—Friction and Wear at High Speeds and Pressures *(a)* 4-114
Borzdyka, A. M.—Creep Properties of Austenitic Alloys *(a)* 3-156
Brinson, G. and A. J. W. Moore—Formation of Zinc Crystals *(a)* 5-180
British Nonferrous Metals Productivity Team—British Views of U. S. Nonferrous Industry *(a)* 1-148
Brown, Hiram—Some Problems in the Fabrication of N-155 Alloy 5-67
Bruckart, K. B., G. W. Wensch and M. Conolly—Polishing Tantalum *(c)* .. 3-81
Bruggeman, T. and Paul Gruner—Defects in Rolled Products *(a)* 3-98
Buckley, L. and E. C. Mantle—Control of Porosity in Gunmetal Castings *(a)* 5-188
Buczynski, J. J. and N. J. Finsterwalder—Deformation Pattern *(c)* .. 2-83
Burns, R. S. and T. F. Olt—Improvements in Quality of Deep Drawing Sheet Steel 2-51
Cable, H. E.—Welded Monoframes *(c)* 3-79
Cassidy, Perry B.—Selling Research to Management *(c)* 3-78
Castaing, R.—Analysis With Electron Beams *(a)* 5-182
Cavanagh, P. E.—Enamel Coatings *(c)* 2-83
Chalmers, Bruce—Fine Crystals at Polished Surface *(c)* 5-94
Child, H. C. and G. T. Harris—High-Temperature Alloy for Rotor Blades *(a)* 4-148
Chula, A.—Grain Refinement of Aluminum Alloys *(a)* 2-152
Cohen, Morris and Francis Kayser—Carbides in High Speed Steel—Their Nature and Quantity 6-79
Compton, K. G., A. Mendizza and S. M. Arnold—"Whiskers" on Metal Surfaces *(a)* 4-172
Conolly, M., K. B. Bruckart and G. W. Wensch—Polishing Tantalum *(c)* .. 3-81
Contractor, G. P.—Graphite Spherulites *(c)* 2-82
Cottrell, C. L. M., M. D. Jackson and J. G. Whitman—Control of Weld Cracking *(a)* 5-116
Critical Points
Basic Lining for Cupolas 6-94
Better Lubrication of Cutting Tools 3-52
Cold Extrusion of Steel Shell at Heintz Mfg. Co. 5-52
Have You Something Hard to Grind or Hot to Handle? 3-53
Light Metals Cast in Gypsum-Sand Molds 3-51
Martempering and Slack Quenching 6-90
A Small Section of Atomic Research 6-89
Steel (Yes, Steel) With 0.45% Sulphur 3-54
Croom, E. A. G. and T. P. Hoar—Chromium Impregnation of Carbon Steel *(a)* 3-118
Cross, H. C., K. Grube, R. Kaiser, L. W. Eastwood and C. M. Schwartz—Wrought Alloys of Magnesium-Cerium *(a)* 5-140
Cuthbertson, J. W., E. A. G. Liddiard, H. K. Hardy and J. V. Higgs—Rebuttal to "Challenges Statement About Aluminum Bearings" by P. G. Forrester *(c)* 2-79
Dale, J. J. Factors Influencing Structure of Electrodeposits *(a)* 3-106
Devernay, E. and P. Leroy—Later Work on the Above (see Blowing a Thomas Converter With Oxygen) *(a)* 2-112
Dewhirst, D. W. and M. J. Olney—High-Temperature Microscope *(a)* .5-166
Dijkstra, L. J. and J. D. Fast—Internal Friction and Aging of Steel *(a)* 5-144
Dilling, E. D., G. L. Frederic and E. T. Hayes—Sheath Working of Zirconium Ingots 5-83
Dolan, Thomas J.—How Can We Appraise Metals for High-Temperature Service? 3-55
Problems of Metallic Fatigue at High Temperatures 4-97
Eastwood, L. W., K. Grube, R. Kaiser, C. M. Schwartz and H. C. Cross—Wrought Alloys of Magnesium-Cerium *(a)* 5-140
Eddy, W. P., Jr., J. C. Mertz and R. H. Thielemann—New Super-Alloys *(a)* 3-127
Embey, E. F., A. C. Jessup and W. F. Higgins—Effect of Phosphorus on Magnesium Alloys *(a)* 5-156

(*a*) Abstract; (*aa*) Atomic Age; (*b*) Biography; (*c*) Correspondence; (*cp*) Critical Points; (*d*) Data Sheet.

Emmanuel, G. N. and W. L. Frankhouser—TTT-Diagrams for 7 and 9% Chromium Steels 5-74
Evangelides, H. A.—Improved Finish for Magnesium Alloys *(a)* 6-166

Table of Contents for Vol. 62

The ABC of Titanium Alloys, by Walter L. Finlay, C. I. Bradford and G. T. Fraser 5–73
Abrasive Tumbling Gives Precision Finishes Economically, by Allen G. Gray 4–101
Accelerated Corrosion Tests of Corrosion Resistant Alloys, by Los Alamos Scientific Laboratory *(a)* 5–186
Accidental Hyper-Graphitization, by Charles H. Junge *(c)* 6–120
Acta Metallurgica (ep) 6–67
A.I.S.I. Standard Alloy Steel Compositions *(d)* 1–96B
Aluminum Alloys of High Modulus, by G. Meikle, J. Thompson and M. E. Whillans *(a)* 3–142
The American Society for Testing Materials Looks at the Metal Tin, reported by Bruce W. Gonser 3–72
The Annual Meeting and Exposition *(ep)* 6–67
Any Cheap Titanium Tomorrow? *(ep)* 6–70
Approximate Critical Temperatures for Steel, by Laboratory of Central Alloy District, Republic Steel Corp. *(d)* 3–96B
Atomic Age
Atomic Energy in Industry, by M. Eugene Merchant 6–138
Atomic Energy Is Big Business 3–97
Experimental Nuclear Explosions . 1–96
Production of Uranium in the U.S. .. 5–89
Austria Is Host to World Congress on Powder Metallurgy, by Henry H. Hausner 5–79
Automatic Heat Treating Line With Duplex Quench Either Oil or Water, by F. C. Schaefer and B. L. Burdsall 5–113
Binary Molybdenum Alloys, by W. L. Bruckart, M. H. Lachance, C. M. Craighead and R. L. Jaffee *(a)* 1–202
Bismuth Thermocouples for Low-Range Operation, by Alvin B. Kaufman *(a)* 6–174
Brazing *(sr)* 5–84
British Commentary on American Steelmaking, by A. H. Leckie *(c)* ... 1–90
British Views of Metal Finishing in America, by Anglo-American Council on Productivity *(a)* 3–159
Brittle Fracture of Mild Steel, by T. S. Robertson *(a)* 5–198
Butt-Welding Paper-Thin Stainless, *Report* of U. S. Naval Ordnance Laboratory *(a)* 5–176
Cavitation Research, by W. J. Rheingans *(a)* 3–156
Chemical Behavior of Sulphur in Iron and Steelmaking, by John Chipman 6–101
Clarifies Remark on 0.50 C Steel, by F. P. Zimmerli *(c)* 2–95
Comments on Dilastrain Method, by Nicholas Grossman *(c)* 5–105
Comment on High Yield Weld Metal, by N. H. Polakowski *(c)* 6–122
Concerned With Fate of HCN Makers, by Harold Wiesner *(c)* 5–107
Controlled Atmosphere Tempering, by Harold N. Ipsen and Donald B. Mathews 1–123
A Cooperative Research Program on Quenching, by Victor Paschkis ... 6–93
Corrosion Data Surveyed in Chart Form, by G. A. Nelson *(a)* 1–169
Corrosion of Zinc Plated Equipment, by K. G. Compton, S. M. Arnold and A. Mendizza *(a)* 5–194
Corrosion Studies at "Sea Horse Institute" *(ep)* 1–88
Creep and Rupture of Austenitic Stainless, by E. J. Dulis, G. V. Smith and E. G. Housion *(a)* 1–244
Creep-Rupture and Recrystallization of Monel, by N. J. Grant and A. G. Bucklin *(a)* 5–172
Critical Points
Acta Metallurgica 6–67
The Annual Meeting and Exposition 6–67
Any Cheap Titanium Tomorrow? . 6–70
Corrosion Studies at "Sea Horse Institute" 1–88
Digging Deeper Into Metal Structure 6–68
Machines for Searching Metal Literature 6–69
Making Good Toolsteel at Latrobe . 1–129
Nonferrous Exhibits 6–68
Danse, L. A.—An Eminent Living Metallurgist *(b)* 5–86
Data Sheets
A.I.S.I. Standard Alloy Steel Compositions 1–96B
Approximate Critical Temperatures for Steel, by Laboratory of Central Alloy District, Republic Steel Corp. 3–96B
Identification of Fractures in Cast Magnesium Alloys, by P. F. George and H. A. Diehl 4–96B
Ni-Cr-Fe Ternary Diagrams 2–96B
Standard Carbon Steels 5–96B
Standard Commercial Wrought Copper and Brasses, Nonleaded and Leaded; compiled by Arthur H. Allen from data published by the Copper and Brass Research Assoc. 6–96B
Defends Use of 0.50 C Steel for Springs, by N. C. Talmage *(c)* 2–95
Degassed Metals, from *Metal Industry (a)* 3–128
Delayed Yield Phenomenon, by T. Vreeland, Jr., D. S. Wood and D. S. Clark *(a)* 4–211
Diffusion of Hydrogen at Elevated Temperatures, by P. L. Chang and W. D. G. Bennet *(a)* 6–180
Digging Deeper Into Metal Structure *(ep)* 6–68
Discard This Etchant Promptly, by L. H. Satz *(c)* 2–96
Distortion and Service Tests of Carburized Gears Made of Boron Steels, by S. L. Widrig and Wilson T. Groves 1–75
Early History of Steel Extrusion, by F. J. DeWitt *(c)* 2–92
Economies of the Small Independent Steel Plant, by H. W. McQuaid *(a)* 2–120
Effect of Boron in Carburizing Steels, by C. F. Jatczak and E. S. Rowland *(a)* 4–171
Effect of Cold Work on Sigma Formation, by E. J. Dulis and G. V. Smith 3–86
Effect of Cr on Eutectoid Carbon, by H. S. Blumberg *(c)* 2–93
Effect of Deformation on Transformation of Austenite to Martensite, by G. V. Kurdyumov, O. P. Maksimova and T. V. Tagunova *(a)* 3–146
Effect of Hardness on Absorption of Impact Hardness, by E. L. Carr, M. Goldman, L. D. Jaffe and D. C. Buffum *(a)* 5–168
Effect of Heat Treatments on Embrittlement, by L. D. Jaffe, D. C. Buffum and E. L. Carr *(a)* 5–142
The Effect of Iron on the Corrosion Resistance of Copper-Nickel Alloys, by G. L. Bailey *(a)* 4–174
Effect of Machining and Grinding on Metal Surfaces, by Peter Spear, Ian B. Robinson and K. J. B. Wolfe *(a)* 6–190
Effect of Sigma on Impact Properties, by A. M. Talbot and D. E. Furman *(a)* 5–196
Effect of Surface Condition on Fatigue Strength, by R. J. Love *(a)* 6–144
Elastic Constants of Some Rare Metals, by Myron B. Reynolds *(a)* 4–248
Electric Furnace Department Manufactures Large Ingots for Specialized Forge Plant, by Arthur H. Allen ...4–118
Electrochemical Production of Zirconium Powder, by Merle E. Sibert and Morris A. Steinberg *(a)* 5–178
Electrotinning Copper Wire, by Frederick A. Lowenheim *(a)* 3–126
Embrittlement in Plated Steel, by John J. Dale *(c)* 2–95
An Eminent Living Metallurgist—L. A. Danse *(b)* 5–86
Engineering Principles and Metal Requirements for Atomic Power Plants, by W. J. Koshuba and V. P. Calkins 1–97
Excellent Products of Aluminum Powder, by John P. Lyle, Jr. 6–97
Experimental Nuclear Explosions *(aa)* 1–96
Explosion Transition of Weldments, by C. E. Harthower and W. S. Pellini *(a)* 3–162
Fabrication of Beryllium Metal, by E. Creutz and D. Gurinsky 6–82
Fatigue Tests at High Temperatures, by H. E. Gresham and B. Hall *(a)* . 3–152
Fastening *(sr)* 5–84
Foundrymen Discuss Shell Molding and Ductile Iron, by Harold J. Roast 1–93
Fretting Corrosion—What It Is, Its Causes and Possible Preventives, reviewed by Arthur H. Allen 6–71
Furnace Flames and Efficiency, by Max Davies *(a)* 1–151
Gas-Liquid Carburizing, by Victor Kappel *(c)* 5–108
A Generalized View of the Scaling Behavior of Metals, by James T. Waber 3–76
German Commentary on American Steelmaking, by Phillip L. F. Boller *(c)* 1–90
German Report on Welding in the U. S., by H. Von Hofe, E. Kauhausen, H. Koch, K. L. Zeyen and E. Zorn *(a)* 2–146
Getting the Most From HAE Coatings, by M. Frager and H. A. Evangelides 3–81
Gilligan, Frank P.—A Biographical Appreciation *(b)* 2–90
Grain Refinement of Titanium, by H. P. Leighly, Jr., and H. L. Walker *(c)* 6–116
Grain Growth in Cartridge Brass, by S. L. Channon and H. L. Walker *(a)* 4–224
Graphitization in Low-Carbon Steels, by W. E. Dennis *(a)* 3–180
Hardness at Elevated Temperatures, by F. Garofalo, P. B. Malenock and G. V. Smith *(a)* 5–164
High-Speed End Heating of Sucker Rods for Upsetting, by D. R. Dale 4–115
High-Temperature Alloys, by H. J. Beattie and F. L. VerSnyder *(a)* ..5–132
High-Temperature Embrittlement of Straight Chromium Steels, by Helmut Thielsch *(a)* 2–156
High-Temperature Properties of Monel, by Paul Shahinian and J. R. Lane *(a)* 4–198
Historical Aspects of and Conservation in Constructional Alloy Steels, by John Mitchell 4–97
Hot Extrusion of Steel Tubes, by W. Trinks *(c)* 5–107
How to Select Research Projects, by W. F. Rockwell, Jr. *(c)* 5–106
Identification of Fractures in Cast Magnesium Alloys, by P. F. George and H. A. Diehl *(d)* 4–96B
Identification of Fractures in Cast Magnesium Alloys, by P. F. George and H. A. Diehl 4–121
Indium-Arsenic Alloys, by T. S. Liu and E. A. Peretti *(a)* 5–170
Impregnation of Castings, by L. W. Hull *(a)* 2–154

(*a*) Abstract; (*aa*) Atomic Age; (*b*) Biography; (*c*) Correspondence; (*ep*) Critical Points; (*d*) Data Sheet; (*sr*) Short Runs.

Ion Exchange—A New Technique for Metallurgists, by Bernard Ostrof and Ernest E. Thum 1-67
Isothermal Heat Treatment of Mechanite Metal, by C. R. Austin 2-109
Isotopic Method for the Determination of Oxygen in Metals, by A. D. Kirshenbaum and A. V. Grosse *(a)* 4-212
Lost Art of Hardening Copper, by G. E. Erickson *(c)* 5-108
Lower Oxides of Titanium, by A. E. Jenkins *(c)* 5-108
The Low-Temperature Cooling Rate Embrittlement of Welds, by A. E. Flanigan and M. Kaufman *(a)* 6-168
Low-Temperature Embrittlement of Welds, by A. E. Flanigan and M. Kaufman *(a)* 4-166
Machinability Correlated With Inclusions, by Lawrence H. Van Vlack *(a)* 4-162
Machinability of Titanium, by R. M. Goldhoff, H. L. Shaw, C. M. Craighead and R. I. Jaffee *(a)* 4-208
Machines for Searching Metal Literature *(cp)* 6-69
Macrographs of Austenitic Welds, by Lorin K. Poole *(c)* 2-94
Magnets of Pressed Powdered Iron, by J. Lamberton *(a)* 5-183
Making and Using Zirconium, by A. D. Merriman *(a)* 6-162
Making Good Toolsteel at Latrobe *(cp)* 4-129
Mechanical Properties of Titanium and Titanium-Base Alloys, by F. D. Rosi, F. C. Perkins, S. M. Bishop, J. W. Spretnak and M. G. Fontana *(a)* 5-174
Mechanism of Tempering, by C. S. Roberts, B. L. Averbach and Morris Cohen *(a)* 5-139
The Melting of Cast Iron Borings, by A. R. Parkes *(a)* 5-183
The Metal Germanium and Its Use in the Electronics Industry, by Anthony S. Bugare 2-97
Metallurgical Activities at Frankford Arsenal, by Daniel J. Murphy 2-67
Metals in Radioactive Static Eliminators, by J. D. Graves 5-94
Mineral or Vegetable? by H. L. Sittler *(c)* 6-114
Modern Brass Mill Turns Out Quality Products in Quantity, by Arthur H. Allen 5-110
Modified Picral for Higher Alloy Steels, by A. E. Schrenberg *(c)* 1-91
Mold Blowing Reaction, by V. Kondic, G. Martin and K. Bromage *(a)* 1-176
More on Hazardous Etchants, by Donald Warner *(c)* 6-122
Mounting Materials for Specimens, by L. A. Hurwitz *(c)* 5-109
M_s Temperature of Titanium Binary Alloys, by Pol Duwez *(a)* 4-246
Nature of Bainite, by Subcommittee XI of American Society for Testing Materials' Committee E-4 on Metallography *(a)* 3-124
New Facilities Increase Openhearth Steel Production, by Leo F. Reinartz *(a)* 3-168
A New Research and Engineering Laboratory, by R. W. Schlumpf 1-79
New Source of Radiation *(a)* 1-164
Ni-Cr-Fe Ternary Diagrams *(d)* 2-96B
Nitride Crucibles, by L. S. Foster *(a)* 2-160
Nodular Iron at Elevated Temperatures, by M. S. Saunders and M. J. Sinnott *(a)* 4-170
Nonferrous Exhibits *(cp)* 6-68
Not as Quoted, by A. B. Edwards *(c)* 5-106
Opinion of U. S. Industry, by Hans Von Hofe *(c)* 5-106
Order-Disorder Transformation, by F. N. Rhines and J. B. Newkirk *(a)* 5-139
Oxygen Refining of Pig Iron, by G. Husson and P. Bettembourg *(a)* 1-156
Plastic Stress-Strain Relations in Aluminum, by Joseph Marin, L. W. Hu and J. F. Hamburg *(a)* 4-205
Plating *(sr)* 5-84
Porous Metal, by David B. Pall *(c)* 2-93
Powder Iron for a Weld Back-Up Material, by H. Hauttmann *(a)* 5-202
Production of Uranium in the U. S. *(aa)* 5-89
Properties of Austenite and Sigma, by T. P. Hoar and K. W. J. Bowen *(a)* 5-136
Properties of Pure Zirconium and Zirconium Alloys, by R. M. Treco *(a)* 4-254
Protecting Metal Surfaces With Paint, by Allen G. Gray 2-79
Protection of Tubular Structures From the Weather by Metallizing, by Alfred Cliff 5-100
Quality Considerations for Bronze Castings, by Harold J. Roast 6-91
Recent Developments in Protective Coatings, by Allen G. Gray 5-90
Residual Stress in Toolsteels, by H. J. Snyder *(a)* 5-162
Retained Austenite in Carburized Alloy Steels, by W. J. Jubsen *(c)* 6-118
Salt Bath Carburizing, by John K. Melver 6-85
SelecCon of Steel for Automobile Parts, by A. L. Boegehold 3-67
Short Runs
Plating, Brazing, Testing, Fastening 5-84
Solders and Soldering, by H. C. Watkins *(a)* 3-179
Solidification of Gray Iron, by R. P. Dunphy and W. S. Pellini *(a)* 2-124
Solidification of Steel, by H. F. Bishop, F. A. Brandt and W. S. Pellini *(a)* 3-172
Source of Hydrogen in Porcelain-Enameled Steel, by D. G. Moore, M. A. Mason and W. N. Harrison *(a)* 1-148
Sources and Identifying Symbols of Government Specifications, by Sherman F. Booth 4-109
Spring Failures and Their Causes, by F. P. Zimmerli 1-84
Standard Carbon Steels *(d)* 5-96B
Statement in Symposium Clarified, by R. J. Wilcox *(c)* 5-109
Steel "Quality"—What It Is and How to Get It, by Harry W. McQuaid ... 2-104
Strain Aging Sheet Steels, by R. L. Shoenberger and E. J. Paliwoda *(a)* 4-222
Stress-Rupture and Creep Testing of Brittle Materials, by W. A. Maxwell and Paul F. Sikora 5-97
Sublimation Crystals of Molybdenum, by Robert B. Pond *(c)* 6-114
Substitution of Straight Chromium Stainless Steels for Chromium-Nickel Types, Symposium organized by John Parina, Jr. 5-97
Subsurface Porosity Developed in Sound Metal During High-Temperature Corrosion, by Anton deS. Brasunas 6-88
Surface Stress in Hard Steel, by A. L. Christenson and E. S. Rowland *(a)* 4-200
Temper-Brittle Steel, by R. D. Chapman and W. E. Jominy *(a)* 4-256
Tempering of Martensite, by A. G. Allten and P. Payson *(a)* 5-134
Testing *(sr)* 5-84
Testing Cemented Carbides, by A. D. Stevens and J. C. Redmond *(a)* 1-124
These HCN Makers Among the Living, by Lewis W. Gleekman *(c)* 5-107
Titanium—Metal and Alloys, by R. S. Radcliffe *(a)* 5-199
Titanium-Oxygen System, by E. S. Bumps, H. D. Kessler and M. Hansen *(a)* 4-174
Titanium Sticks to Indenter, by H. P. Leighly, Jr., and H. L. Walker *(c)* 5-109
Transformations in Copper Alloys, by R. Cabarat, G. Pence, L. Guillet and R. Le Roux *(a)* 1-150
Treatment of Metal Finishing Wastes, by Allen G. Gray 6-77
The Use of Castings in Airframe Design, by A. H. Petersen 5-67
Using Hardness to Determine Metal Strength at Various Temperatures, by J. H. Westbrook *(a)* 4-166
Visitor Comments on U. S. Welding, by Egon Kauhausen *(c)* 2-94
Welcomes Comment on High Yield of Weld Metal, by R. A. Huseby *(c)* ..6-124
Welding of Titanium, by E. F. Holt and W. H. Moore *(a)* 5-184
Westinghouse Electric Correlates Its Product Development With Research, by John Parina, Jr. 2-73
What Price Hardenability? by Harry W. McQuaid 3-88
Zinc in Stock in Ample Quantities, by C. R. Maxon *(c)* 6-126
Zirconium-Tin and Zirconium-Silicon Systems, by D. J. McPherson, M. Hansen and C. E. Lundin *(a)* 4-219
